

COGNITIVE NEUROPSYCHOLOGY

Student Travel Prize Winners

On behalf of Psychology Press and the Editors of *Cognitive Neuropsychology*, we are delighted to confirm the three recipients of the 2012 *Cognitive Neuropsychology* Student Travel Prize. The recipients are:

Jacqueline Snow

University of Western Ontario, Canada

Haptic Shape Recognition without the Lateral Occipital Area: A Case Study

Gilles Vannuscorps

Catholic University of Louvain, Belgium

When does action comprehension need motor involvement? Evidence from upper limb apraxia

Both to be presented at the Rovereto workshop on Concepts, Actions, and Objects: Functional and Neural Perspectives, University of Trento, Italy, May 24th – 27th 2012

Joris Vangeneugden

Italian Institute of Technology, Italy

Double dissociation between the extrastriate body area and the posterior superior temporal sulcus during biological motion perception: converging evidence from TMS and fMRI

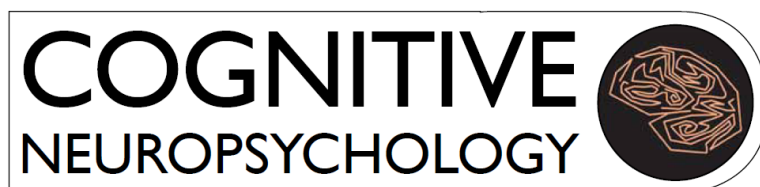

To be presented at the Asia-Pacific Conference on Vision, Incheon, Korea, July 13th - July 15th 2012

There were over a hundred applications that were judged by the Action Editors of the journal, making this a very competitive award. The three successful abstracts were selected on the basis of their scientific merit and for their contribution of the research to the field of Cognitive Neuropsychology.

Congratulations to the prize recipients! We wish all applicants great success with your conference presentations and in your future research.

The journal *Cognitive Neuropsychology* will award three more travel prizes in 2012 to graduate students or post-doctoral students. The prizes will consist of awards of up to \$750 (US) that can be applied for costs of travel, lodging and registration fees for students presenting a poster or a talk reporting on original cognitive neuropsychological research at a conference. The next deadline to apply is September 1st 2012.
